

GhostProofJob

Get answered, not ghosted.

The ethical, free-until-hired job search · ghostproofjob.com

Job hunting is broken.

You apply into the void, wait weeks, and hear nothing back. Worse, many postings are “**ghost jobs**” — roles that aren’t really hiring, quietly wasting your time. GhostProofJob fixes it: only **verified, live openings**, a **community ghosting-risk score** on every company, and an honest AI co-pilot that never invents experience.

What you get

■ Build

Swipe real, verified openings near you — each one flagged with its ghost-risk before you invest.

■ Optimize

An honest AI co-pilot tailors your résumé + cover letter per role — using only your real experience.

■ Apply

Jump straight to the real posting. Track every application so nothing falls through the cracks.

■ Simplify

One inbox for every message, interview, and match. See where you stand — no more silence.

The difference: see the ghosting risk *before* you apply

Every company carries a **community-sourced ghosting-risk score**, built from real applicant reports and verified-employer signals — never a made-up number. When a company goes quiet on you, one tap logs it, and your wasted hour becomes a warning that protects the next hunter.

Why you can trust it

- ✓ **Always free until you’re hired.** No ads, ever. Applications are always unlimited.
- ✓ **We never sell your data.** Your résumé is shared with an employer **only** when *you* apply — never sold, never purchasable.
- ✓ **Real data only.** Verified roles and honest community signals — the AI never fabricates experience or metrics.
- ✓ **You’re in control.** See exactly what’s stored about you, export it, or delete it — anytime.

How it works

GhostProofJob
